

IDEAL AW40

**Air washer for clean and humidified indoor air.
With automatic function.**

For room sizes of up to 40 m²

Air humidification and cleaning

No consumables

Ionic Silver Stick® (anti-bacterial)

Low energy consumption

Quiet operation

Recommended for allergy sufferers

Technical data

Power supply	220 - 240 V, 50/60 Hz
Power consumption	10 / 16 watts
Humidification performance	300 g/h
Noise level (dB)	< 25 dB (A)
Water capacity	7 litres
Dimensions (H x W x D)	407 x 323 x 336 mm
Weight	6 kg

Product description

The air washer's operating principle combines cleaning the air with ideal humidification. Suitable for room sizes of up to 40 m². For ideally washed and humidified air. Water as a natural filter binds contaminations such as dusts, allergens and particle-bound odours. And all this without any additional consumables or replacement filters. At the same time, the device ensures ideal air humidity according to the hygienic cold evaporation principle. Specially structured humidification discs rotate through the water - enriching the air with humidity. Thanks to the integrated humidity switch, the air humidity can be controlled at the push of a button to achieve an ideal room climate. A digital humidity display shows the relative humidity in the room at the push of a button. Cleaning mode for simple and hygienic device cleaning with practical memory display for cleaning and maintenance - automatically indicates when to clean the device, to refill the water tank or to replace the Ionic Silver Stick®. All components can be removed from the case with a single movement. Intelligent light sensor for auto-matic switching to night operation. Automatic dimming of display during night time. This makes the device ideal for use in sleeping rooms or children's rooms. Energy-efficient and extremely smooth-running motor. Automatic switch-off when the water tank is empty. Recommended for allergy sufferers - cleans the air from pollen and house dust thus preventing agitations of dust or allergic reactions.

IDEAL

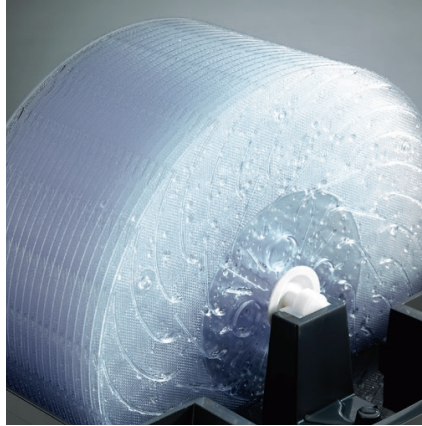

IDEAL AW40

Device features

CONTROLLED AIR HUMIDIFICATION

The hygrostat automatically controls the air humidification (up to 300 ml of water per hour). The device releases the desired quantity of humidity into the indoor air. This always guarantees the right air humidity.

NATURAL CLEANLINESS

Specifically structured humidifying discs rotate through the water. They clean („wash“) and humidify the air (by cold evaporation). Even smallest particles are bound in the water and separated.

CONVENIENT WATER SUPPLY

Transparent and removable water tank with handle. Ensures simple filling.

IDEAL WATER QUALITY

Due to the antimicrobial effect of silver, the Ionic Silver Stick® ensures germ-free water quality within the device.
